Cathy Weng
The College of New Jersey

NJLA Conference, April 21, 2015

Outline

- Authority Control
 - ▣ What
 - ▣ Why
- MARC 21 Authority Record
 - ▣ Record structure
 - ▣ New elements used in RDA environment
- FRAD and RDA
- Performing authority control

Authority Control

3

- Process of establishing a recognized form for an entity and using that form as an access point throughout the catalog.

e.g.

Rowling, J. K.

King, Stephen, 1947-

Library of Congress, "What is a marc record, and why is it important?" (<http://www.loc.gov/marc/uma/pt1-7.html>) Accessed 3/28/15

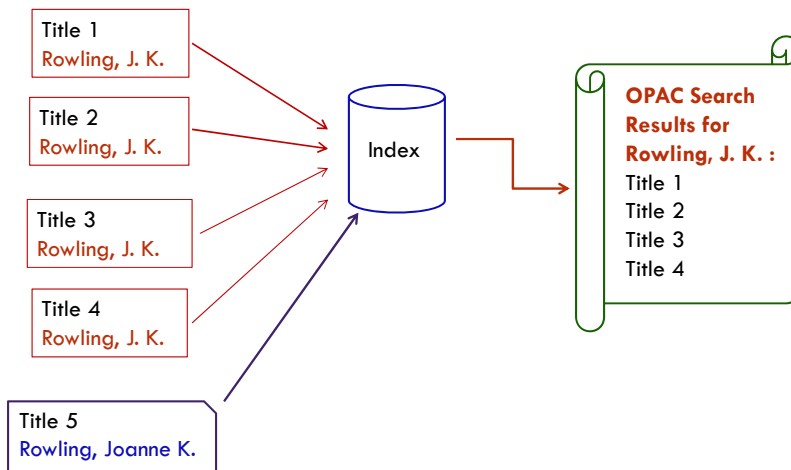

Characteristics of Authority Control

4

- **Consistency** – Different forms of same name used in books will be given one form in the catalog
- **Cross references** – lead users to established headings and related headings
- **Collocation** – Records with the same access points will be retrieved which helps locate relevant resources
- Without authority control, finding relevant materials will be difficult.

Authority Files Supports Authority Control

13

- Files of authority records
- **Authority function:** support consistency of headings
- **Finding function:** provide links from variants and other authorized headings
- **Information function:** show usage and scope of headings
- **Maintenance function:** support manual and automatic error detection and correction

Block, Rick J. 1999. "Authority Control: What It Is and Why It Matters."

Authority Control Behind the Scenes

14

- Standardized form of names and subjects constructed and stored in authority records
- Authority records created following content standards (e.g. RDA) and data standards (e.g. MARC 21)
- Needs ongoing effort to keep up with information changes
- Provides linkage between authority files and bibliographic records

Library of Congress, "What is a marc record, and why is it important?" (<http://www.loc.gov/marc/uma/pt1-7.html>) Accessed 3/28/15

RDA and Authority Control

24

- Resource Description and **Access**
- Resources Access – establish and maintain consistent access points in bibliographic and authority records to help find resources
- RDA authority tasks based on the FRAD Model
- Aim to support four user tasks

FRAD

25

- **F**unctional **R**equirements for **A**uthority **D**ata
- Focus on FRBR Group 2 entities and relationships
- Relationships between
 - ▣ Person/corporate body/family (G2) *and*
 - ▣ Work/Expression/Manifestation/Item (G1)
- Person/corporate body/family responsible for:
 - ▣ Intellectual and artistic creation of a work
 - ▣ Production and distribution of a manifestation
 - ▣ Ownership of an item

FRAD User Tasks

26

- **Find:** Find an entity or set of entities corresponding to stated criteria;
- **Identify:** Identify an entity;
- **Contextualize:** Place a person, corporate body, work, etc. in context;
- **Justify:** Document the authority record creator's reason for choosing the name or form of name on which an access point is based.

What have we learned about Authority Control

49

- Critical (helps retrieval; brings precision to searches)
- Takes time
- Needs training
- Needs to follow standards
- Needs frequent maintenance
- Changes in authority records should reflect in bibliographic records

What can you do?

50

- Clean your bibliographic database if possible
- Begin to incorporate authority checking into cataloging workflow
- Only need to focus on non-LC/non-pcc records
- Strongly encouraged: Join NACO and help create authority records for the cataloging community

Thank You!
